Reviews

*This pdf might be well worth a study, and a lot better than other. It really is simplistic but excitement inside the fifty percent in the book. Its been printed in an exceedingly straightforward way which is just after i finished reading this ebook through which really modified me, modify the way i believe.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 34 pages. OCLC Number: (OCoLC)53345273 Subject: Coal-fired power plants -- Technological innovations -- Florida. Excerpt: . . . Ash Handling System Generating Station is obtained from the District II Water Reclamation Facility, transported via an eight-mile pipe-The ash handling system transports bed ash from the line. The wastewater is treated through primary, second-outlets of the stripper coolers to the bed ash silos, and ary and advanced treatment. During primary treatment, fl y ash from the economizer, air heater hoppers, and large solids are removed. Secondary treatment uses mi-baghouse hoppers to the fl y ash silos. Two sets of ash croorganisms to remove the remaining solids and organic handling systems and associated equipment are provided, material. one for Unit 1 and the other for Unit 2. The bed ash me-chanical conveying system and fl y ash vacuum conveying After secondary treatment, the wastewater travels system in turn consist of two fully independent parallel through cloth membrane fi lters, with a pore size of ap-lines. Normally any one line is in operation and the other is proximately 10 microns, to remove virtually all remaining an installed spare; however, in an emergency upset condi-solids. During advanced or fi nal treatment, the wastewa-tion, both lines can be operated simultaneously. ter is disinfected using chlorine or ultraviolet light to de-stroy bacteria, viruses and other pathogens. The bed ash and fl y ash from the ash silos is slurried using reclaimed water, mixed together, and pumped as a Consumption of reuse water is expected to be more dense slurry to the by-product storage area. than 1 million gallons day when all three units are op-erating. The reuse water is used for circulating water Reuse Water System pump seals, boiler precipitation area drains, polishing Reuse...
