

Gravity Manipulation and its Binary Nature

Filesize: 3.67 MB

Reviews

These types of pdf is the greatest pdf readily available. I actually have study and that i am certain that i am going to going to go through again again later on. You wont sense monotony at at any moment of your own time (that's what catalogs are for relating to when you request me).

GRIN Verlag Jul 2007, 2007. Taschenbuch. Book Condition: Neu. 210x148x2 mm. This item is printed on demand - Print on Demand Neuware - Scientific Study from the year 2003 in the subject Physics - Theoretical Physics, printed single-sided, grade: -, University of Barcelona, 13 entries in the bibliography, language: English, abstract: By assigning the elementary Planck units to the units of Newton s Gravitational Constant (G), it resulted that G is actually a function of vacuum (zero point) energy (ZPE) and that it can be therefore manipulated. This paper cites and discusses some possible kinds of Gravity manipulation. ZPE appears to reduce gravity as it is inversely proportional to the gravitational force. From Coulomb s Constant, the Planck charge (qP) and the corresponding quantum vacuum (QV) lepton/photon ratio are calculated, the latter by dividing qP by the Planck mass. The QV-lepton/photon ratio is very different to the analogous baryon/photon ratio that is predicted by Standard Model, demonstrating that the QV and space-time are two different entities (e.g., that they have a different number of dimensions). A dimensional model for the QV that evolves from, and is supported by, the lepton/photon ratio is presented herein, together with emerging technologies. By expressing natural constants in terms of Planck units, we found that the Universal Gravitation Constant is the inverse of vacuum density matter-equivalent and the square of Planck time, being the former equal to Planck mass divided by Planck volume. The corresponding new equation of gravitation presented here reveals that gravitation can be manipulated via vacuum energy. Additionally, from Coulomb s constant, we can derive the Planck charge and the corresponding density of virtual vacuum particle pairs. A discussion of the ramifications of these findings is also presented. 32 pp. Englisch.
